DETAILED ACTION

Allowable Subject Matter

Claims 1-17 are allowed.

The following is an examiner's statement of reasons for allowance: The closest prior art (Kimura et al. US 2003/018134) is antedated by the English translation of the foreign priority document submitted on 5/22/07.

The other closest prior art fails to teach or make obvious "wherein the first optical element comprises: a first optical functional section; and a first flange section integrally formed in one body around the first optical functional section, wherein the second optical element comprises: a second optical functional section; and a second flange section integrally formed in one body around the second optical functional section, and wherein the first flange section and the second flange section come in contact with each other and are formed so as to fix the first and second optical elements at predetermined respective relative positions".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
